

CHI SIAMO / ABOUT US

MISSION

Dimcar è l'industria italiana di arredo urbano per eccellenza. Al fianco di Enti pubblici, Società di servizi ed Istituzioni, vestiamo lo spazio e la città in modo elegante e funzionale con attrezzature ad alto standard, dal design tutto italiano, idonee secondo le certificazioni di qualità e conformità.

VISION

Creare spazi urbani belli e funzionali, sostenibili, fruibili da bambini, donne, adulti ed anziani che vogliono vivere la città in armonia con l'ambiente circostante.

ABOUT US

Le migliori città italiane sono vestite dagli arredi **DIMCAR**, che premiano ed esaltano il Bel Paese con il gusto ed il design tipicamente italiani.

DIMCAR è attenzione al dettaglio, al design e alla qualità. Il processo produttivo è interamente concentrato all'interno dell'azienda, che si avvale di un know-how elevatissimo e di attrezzature all'avanguardia.

Ricerca e sviluppo, innovazioni e micro innovazioni delle nostre strutture: ciò è frutto della vocazione a migliorare.

La ricerca è l'elemento indispensabile per aggiornare, perfezionare e migliorare continuamente i nostri prodotti nonché renderli conformi alle nuove esigenze di mercato, alle nuove tendenze e alle vigenti normative.

Materie prime selezionate, metodi di lavorazione innovativi ed un approccio sostenibile permette ai prodotti **DIMCAR** di godere della certificazione CAM.

PROPOSAL MISSION

Dimcar is an Italian urban and outdoor furniture industry par excellence. Alongside Public Bodies, Service Companies and Institutions, we dress the space and the city in an elegant and functional way with high standard equipment, from the all-Italian design, suitable according to the certifications of quality and conformity.

VISION

Create beautiful and functional urban spaces, sustainable, accessible by children, women, adults and the elderly who want to live the city in harmony with the surrounding environment.

ABOUT US

*The best Italian cities are dressed by **DIMCAR** furniture, which reward and enhance the Bel Paese with the typical Italian taste and design.*

*Quality, service, design, attention to details and customer care are **DIMCAR'S** priorities and values. The production process is entirely segmented within the company, which uses high know-how and cutting-edge equipment. Not only experience, knowledge of construction techniques, skilled staff and efficient organization are required to obtain success.*

*Solid principles are required: accuracy and foresight of projects, quality of life, quality of materials, careful selection of workers and ethics in the work. All these values are **DIMCAR'S** historical features. Selected raw materials, innovative processing methods and a sustainable approach allows dimcar products to enjoy Minimum Environmental Criteria.*

Ciclostazione / Bike Station ACCESSORI

cod. 910-O-PAV PAVIMENTO INTERNO **Resysta**

La struttura può essere fornita con pavimentazione interna, realizzata con esclusivi profili **Resysta** realizzati in fibra di riso, dalla particolare resistenza, dove non occorre alcun tipo di manutenzione e dall'aspetto estetico di grande pregio. I profili sono installati su opportuni telai in acciaio zincato dal facile posizionamento all'interno della Ciclostazione e dal facile montaggio.

cod. 910-O-CSO CONTROSOFFITTO

Controsoffitto interno realizzato con profili di acciaio zincato, disposti per il fissaggio in sequenza.

cod. 910-O-VID SISTEMA VIDEOSORVEGLIANZA

Impianto di video-sorveglianza e controllo accessi integrato alla struttura costituito da DVR, e posizionamento di telecamere di tipo IP 2k.

cod. 910-O-ALL SISTEMA DI ALLARME

Il sistema di antifurto può essere automaticamente inserito/disinserito in coerenza con il calendario di esercizio della ciclostazione. Il sistema potrà essere inserito/disinserito anche manualmente da operatore. Sarà dotato di unità centrale per la gestione dei vari sensori ad infrarossi, sirena e sistema di comunicazione per la notifica.

cod. 910-O-AUT APERTURA AUTOMATICA

Sistema di apertura porta automatizzata costituito da singola anta di tipo scorrevole in vetro trasparente stratificato con sistema automatizzato di apertura.

RIVESTIMENTI DISPONIBILI

La Ciclostazione può essere fornita con moduli di rivestimento laterale in ben 5 tipologie differenti:

Cod. 910-R-VT

Modulo in vetro stratificato di sicurezza – Antinfortunio EN 12600 spessore mm 4+4 con telaio in acciaio zincato ed opportune guarnizioni. Garantisce spazi luminosi e idonea sicurezza.

Cod. 910-R-FR

Modulo in frangisole, costituito da profili sagomati in lamiera zincata resi solidali da opportuno telaio perimetrale, ideale per offrire un ottimale areazione degli spazi interni.

Cod. 910-R-PL

Modulo in policarbonato compatto trasparente spessore mm 5 fissato su apposito telaio realizzato in profili di acciaio zincato.

Cod. 910-R-RY

Modulo con profilo **Resysta** in fibra di riso, in combinazioni di sezione, per un impatto estetico esclusivo e di grande durabilità.

cod. 910-O-AVA APERTURA AVANZATA

Sistema di apertura porta avanzata con controllo RFID e/o da Remoto attraverso l'utilizzo di uno smartphone con calendarizzazione delle autorizzazioni. Soluzioni di elettronica avanzata in termini di riconoscimento e controllo accessi che garantiscono sempre la massima sicurezza.

Cod. 910-R-CB

Modulo in coibentato liscio, per fornire al Cliente una superficie in grado di ospitare eventuali grafiche, o per assicurare un rivestimento leggero e duraturo.

QUALITÀ E CERTIFICAZIONI

QUALITY & CERTIFICATIONS

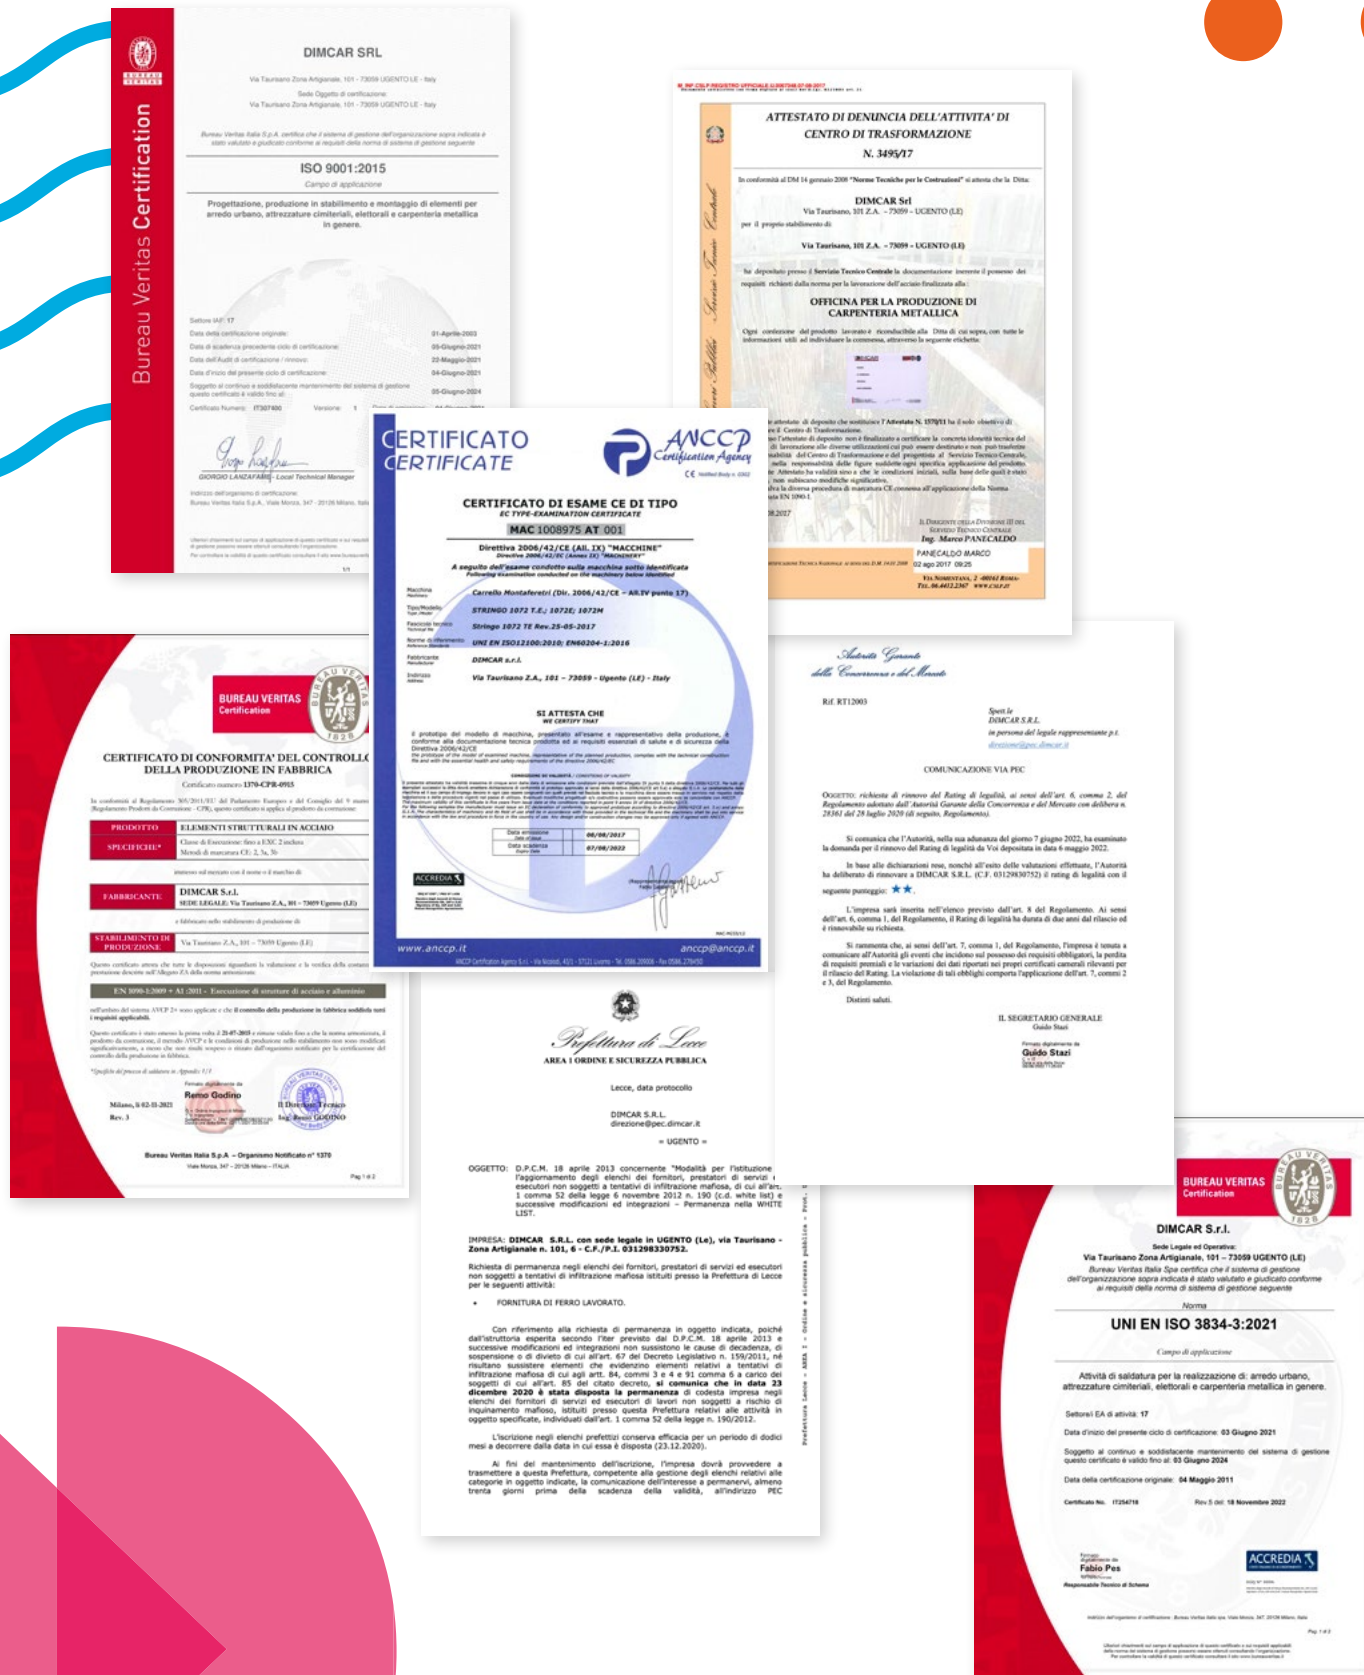

Nel corso degli anni lo sviluppo di DIMCAR ha interessato e trasformato tutti i processi produttivi, migliorando l'efficienza industriale e assecondando le esigenze tecniche dei clienti. Elemento distintivo e garanzia del costante impegno profuso da Dimcar S.r.l. nell'offrire ai propri clienti Qualità totale, sono le seguenti certificazioni conseguite:

- Certificazione EN 1090-1:2009+A1:2011 -conformità strutture in acciaio (obbligatoria dal 1° luglio 2014);
- Certificazione di qualità ISO 9001:2015 (progettazione, produzione in stabilimento ed installazione di arredo urbano, attrezzature cimiteriali, elettorali e carpenteria metallica in genere);
- Certificazione di conformità delle attività di saldatura alle norme UNI EN ISO 3834-3:2021 (attività di saldatura per la realizzazione di: arredo urbano, attrezzature cimiteriali, elettorali e carpenteria metallica in genere, rilasciato dall'Ente di accreditamento : Accredia;
- Attestato di denuncia dell'attività di centro di trasformazione: Attestato n. 3495/17;
- Azienda iscritta nell'elenco dei fornitori dei prestatori di servizi e degli esecutori di lavori non soggetti a tentativo di infiltrazione mafiosa. Art. 1 comma 52 della legge 8 novembre 2012 n. 190 (c.d. White list);
- Certificazione CAM – Ecolabel di Tipo II. I Criteri minimi ambientali (CAM) sono i requisiti ambientali definiti per le varie fasi del processo di acquisto finalizzati all'individuazione delle migliori soluzioni progettuali.

Over the years the development of Dimcar has affected and transformed all production processes, improving industrial efficiency and meeting the technical requirements of the customers.

A distinctive element and guarantee of Dimcar S.r.l. 's constant commitment to offering its customers total quality, are the following certifications:

- *Certificate of conformity of the factory production control according to EN 1090-1:2009+A1:2001 standards;*
- *Certificate of Quality management system ISO 9001:2015 for: Design, production and assembly of elements for urban furniture, cemeterial and electoral equipment and metal general carpentry;*
- *Quality certification of welding activities to UNI EN ISO 3834-3:2021 standards for welding activities for the realization of urban furniture, cemeterial and electoral equipment and metal general carpentry issued by the accreditation body: Accredia;*
- *Attestation of notified activity of Steel processing center: Certificate N.3495/17;*
- *Company on the list of service providers and contractors not subject to attempted mafia infiltration. Art. 1 paragraph 52 of Law 8 November 2012 n. 190 (White list);*
- *Minimum environmental Criteria certificate (CAM) – Ecolabel Type II- The Minimum environmental criteria are environmental requirements defined for the various phases of the purchase process aimed at identifying the best design solutions.*

MATERIALI & COLORI / MATERIALS & COLOURS

Come per il design, ogni nostro prodotto nasconde una storia, quella dei suoi materiali e colori. Selezioniamo accuratamente e collaudiamo con attenzione i nostri materiali e colori che trattiamo in modo economico ed ecologico. L'acciaio è il materiale di base per la maggior parte dei nostri prodotti ed è sempre protetto dalla zincatura.

Just as with the design of our products, behind every piece of street furniture there is the story of the materials and colours composing it. The materials they are made from are held to the highest standards. We are founded upon carefully selected, proven materials and colours, which we handle economically and ecologically. Steel is the basic material for the majority of our products and is always protected by zinc coating.

TRATTAMENTI E FINITURE DEI MATERIALI / ANTICORROSIVE TREATMENT AND FINISHING

Pre-trattamento

Prima di essere verniciato, il manufatto, viene pre-trattato mediante un lavaggio a spruzzo con speciali liquidi sgrassanti. Dopo il lavaggio, il manufatto da verniciare, viene asciugato per 15 minuti in essiccatoio.

Trattamento anticorrosivo

Al fine di conferire idonea protezione contro gli agenti atmosferici, il manufatto è sottoposto ad un primo ciclo di verniciatura utilizzando un fondo anticorrosivo in polvere termoindurente a base di resine epossidiche con speciali pigmenti.

Prima cottura (anticorrosivo)

Il manufatto trattato con il fondo anticorrosivo è sottoposto ad una prima cottura al forno della durata di 15 minuti alla temperatura di 180°. In questa fase l'anticorrosivo polimerizza.

Verniciatura

Il manufatto è sottoposto ad un ciclo finale di verniciatura con polvere termoindurente a base di resine poliestere. La verniciatura è eseguita con apparecchiature a spruzzo elettrostatico, che consentono alla polvere di depositarsi uniformemente sui pezzi.

Cottura finale

Il manufatto verniciato è sottoposto ad una cottura finale al forno della durata di 20 minuti alla temperatura di 160°.

Pre-treatment

Before being painted, the manufactured product is pre-treated by spray washing with special degreasing liquids. After washing, the product is dried for 15 minutes in a kiln, before being painted.

Anticorrosive treatment

In order to provide suitable protection against atmospheric agents, the manufactured product is subjected to a first painting cycle using an anticorrosive primer in thermosetting powder based on epoxy resins with special pigments.

First baking (anticorrosive):

The manufactured product treated with the anticorrosive primer undergoes a first baking in the kiln lasting 15 minutes at a temperature of 180°. At this stage the anticorrosive polymerizes.

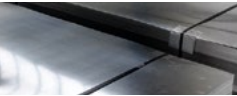

Coating

The manufactured product is subjected to a final painting process with thermosetting powder coating based on polyester resins. The coating is carried out with electrostatic spray equipment, which allows the powder to evenly deposit on the pieces.

Final baking

The painted manufactured product is subjected to a final baking in the kiln lasting 20 minutes at a temperature of 160°.
